EDUCATION

Université du Québec à Montréal

Advanced Certificate in Software Development

Montréal, QC

2026

Université de Montréal

Computer Science (B.Sc.)

Montréal, QC

2022 – 2025

EXPERIENCE

Security Analyst

Canada Revenue Agency (CRA)

July 2024 – June 2025

Ottawa, ON

- Analyze security risks of software and created accounts to approve or deny requests for additional permissions.
- Collaborate and communicate with all individuals within the CRA (59,045 employees).
- Escalate complex cases to a senior developer or request additional information to resolve issues.

Tutor

MonsieurMath

October 2023 – June 2025

Montréal, QC

- Personalized guidance for more than 20 students, leading to academic success with an average score above 80%.
- Optimization of remote learning through the collaborative use of Teams and Miro for the visualization of complex concepts.
- Design of iterative learning plans based on the specific objectives of each student.
- Analysis and management of pedagogical data via Excel to automate progress tracking.

Patroller and Instructor

Ski-Cool, Relais Plein air

Winter 2017 – Winter 2018

Gatineau, QC

- Communication and popularization of technical and physical concepts to a varied audience to accelerate learning and skill mastery.
- Quick decision-making and rigorous application of safety protocols in emergency situations, demonstrating optimal stress management.

PROJECTS

Collaborative Whiteboard | *TypeScript, React.js, Convex, Clerk, Liveblocks*

[Github](#) | [Live Demo](#)

- Development of a Full Stack real-time collaborative whiteboard application allowing multiple users to draw and interact simultaneously.
- Implementation of secure authentication with **Clerk** and real-time synchronization with **Liveblocks**.
- Use of **Convex** as a reactive database and **Next.js** for a modern and high-performance web architecture.

BorderMate | *React.js, TypeScript, REST API*

[Github](#) | [Live Demo](#)

- Automated multilingual communication application with real-time processing.
- Resilient architecture with **multiple APIs** for high availability.
- Collaboration using GitHub and automated **CI/CD** deployment on GitHub Pages.

Host Language Contribution to a Compiler | *Scheme, BASIC, x86*

[Github](#)

- Project carried out as part of a course on the compilation of programming languages.
- 4-month project focusing on the creation of a programming language.
- Addition of a host language allowing the compilation of a subset of Scheme.

TECHNICAL SKILLS

Languages: Python, Java, SQL, TypeScript, Haskell, C, C++, Scheme, Swift, Gambit, BASIC

Frameworks: React, NumPy, Node.js, Three.js

Developer Tools: Git, VS Code, Visual Studio, Docker, Microsoft 365 suite.
